

CEROIL DPF CLEANER

Diesel particulate filter cleaner (DPF)

PRODUCT

Ceroil **DPF Cleaner** is a high-performance cleaner that regenerates and removes soot from the DPF quickly and safely, reducing maintenance costs. Due to stop-go driving on short journeys, the DPF does not reach the temperature to remove the soot deposited on it. Engines automatically regenerate the DPF by injecting diesel to trigger combustion, but this type of driving interrupts the process and soot builds up excessively. This causes the DPF warning light to light up and a loss of engine power, as well as excessive fuel consumption and possible breakdowns.

UTILITY

For any type of diesel engine and any DPF.

ADVANTAGES

- Cleans and regenerates the DPF (diesel particulate filter).
- Reduces the combustion temperature of soot in the DPF.
- Extends the life of the particulate filter.
- Ideal treatment for vehicles on short journeys.

APPLICATION

SHAKE BEFORE USE

1. Pour the dose into the tank, preferably in reserve.
2. Start the engine and let it idle for 4 min. above 2.000 rpm.
3. Drive for 20-30 minutes above 2000rpm
4. Stop the vehicle and let it cool down at idling speed for about 5 minutes.

TECHNICAL DATA	
Colour	Light amber
Aspect	Liquid
Flashing Point	30°C
Density	0,774 g/ml. ± 0,008
Water solubility	Unsolvable

Reference	Capacity	Unit Box
C00033FNA	500 ml.	12
C00033HNA	1 L.	12

DOSE

Recommended Minimum: 5%
Ideal: 10%.

As a preventive treatment ideally use every 3.000 Km.

**Respectful with
ENVIRONMENT**
