

CEROIL DRY LUBE

Dry lubrication with ceramics

PRODUCT

Lubricant with high ceramic concentration, for dry lubrication of metal and plastic materials.

UTILITY

For all types of use such as lubrication of guides and slideways. Ejectors and slides in injection moulds. Firearms. Excellent release and anti-sticking agent for high temperatures. Elimination of weld spatter. Dry lubrication for all industrial sectors.

ADVANTATGES

- Reduces friction, prevents wear and protects against corrosion.
- Lubricates dry up to 950°C in continuous operation.
- Reduces noise (metal on metal).
- Prevents metal seizure due to temperature, humidity or rust.
- Does not attack rubber, plastics or metals.
- Prevents adherence of salts, inks, dust, mud, etc.

APLICACION

SHAKE BEFORE USE

1. Clean the parts to be treated with a Ceroil cleaner, if necessary.
2. Spray the part to be treated.
