

ÚÜUÖWCV

It is a specific product for the ecological washing, without water, of all types of vehicles (cars, commercial vehicles, motorcycles, bicycles, etc.). Its special formula allows the vehicle to be thoroughly washed, including rims and tires, without the need for water, which significantly saves natural resources and avoids pollution and effluent disposal. Removes all dirt adhered to the vehicle: oils, dust, insects, etc.; Respect the paint and provide a high quality finish with spectacular shine, leaving a soft, slippery touch that repels dust, keeping the surface clean and shiny longer. It meets all the requirements required by current international standards in terms of quality, biodegradability and respect for the environment.

APPLICATION

Because it is a multilayer product. IT SHOULD BE SHAKEN BEFORE EACH SPRAYING. Apply to areas by spraying on the surface and rubbing with the first cloth to remove the strongest dirt. Then rub with the second cloth until the surface is dry, clean and shiny. To clean the tires, spray on the tire, scrub first with cellulosic paper to remove dirt and finally with the cloth to get shine. In tires, to restore the appearance of new ones, gently spray and spread the product over the entire surface. In case of a large amount of dirt, mud or dust, it is recommended to do a pre-wash before. Do not apply when the body is too hot
