DF C 81 CH

Specific product for ecological washing, without water, of motorcycles of all kinds. Its special formula allows the vehicle to be thoroughly washed, including rims and tires, without the need for water, obtaining significant savings in natural resources and avoiding pollution and effluent disposal. Eliminates all the dirt adhered to the vehicle: oils, dust, insects, etc. Respecting the paint and providing a high quality finish with a spectacular shine, leaving a soft and slippery touch that repels dust, keeping the surface clean and shiny for longer. Complies with all the requirements demanded by current international standards in terms of quality, biodegradability and respect for the environment

5DP@C5T-CB

Because it is a multilayer product.
SHOULD BE SHAKEN BEFORE EACH
SPRAY

Apply to the areas by spraying on the surface and rubbing with a pao to remove the stickiest dirt. Then rub with another pao until the surface is dry, clean and shiny. To clean the tires, spray on the tire, rub first with cellulose paper to remove dirt and finally with the pao to get shine. In case of a large amount of dirt, mud or dust, it is recommended to do a pre-wash before. Do not apply when the body is too hot. □

Sprayer de 500ml
