

PRODUCT

Specific product for the sanitization or sanitization of any fabric or surface, as well as bodies and internal parts of vehicles or motorcycle helmets. Ideal for dealing with all kinds of boutique items (clothing and footwear) and vehicles (cars, industrial vehicles, motorcycles, bicycles, scooters, etc.). Formulated based on benzalkonium chloride and a mixture of alcohols. Ensuring thorough hygiene is essential in collective vehicles, rental vehicles, public service vehicles (taxis, buses, ambulances, municipal vehicles, etc.) and commercial and industrial vehicles, etc. that are usually driven by different people. It is also recommended to sanitize or sanitize all objects that are touched frequently, such as mouse, keyboard or smartphone screen, among others.

APPLICATION

Apply to surfaces or parts of the vehicle to be treated after cleaning and drying.

Apply directly and evenly. Let dry, do not rinse

Apply especially in areas that are usually touched with the hands: door knobs and trunks, mirror boxes, door handles, etc.

✓ Use a cloth impregnated with the product and apply especially to parts in contact with hands: steering wheel, handlebars, door handles, internal door handles, door handles, parking brake, glove box, buttons, light controls and keyboards, etc.

✓ Does not damage rubbers, plastics, fabrics or fabrics.

Do not apply when the body or surfaces are too hot
