

CEROIL ADMISION CLEAN

Intake system cleaner

PRODUCT

Powerful organic cleaner that removes residues and sediments from the intake circuit, turbos, EGR valves, etc. Ideal pre-ITV treatment.

UTILITY

For all intake circuits of diesel and petrol engines, turbochargers and carburettors. Excellent foam filter cleaner.

ADVANTAGES

- Reduces fuel consumption and pollutant emissions.
- Removes debris and sediment from the intake circuit.
- Protects and cleans the oxygen sensors and catalytic converter.
- Clean by wear and /or licking, eliminating the risk of hard particles with firm cores entering the combustion chambers.
- Resets idle speed.

PRODUCT PACKAGED WITH NON-FLAMMABLE SAFETY GAS.

APLICACIÓN

- Run the engine up to operating temperature.
- With the engine idling, uncover the air intake (as close as possible to the cylinder head and after air filter).
 - Point the aerosol towards the air intake at a distance of 15-20 cm.
 - Accelerate to 3,000 rpm spraying the product for 5 seconds.
 - Stop spraying and accelerate gently to regulate the mixture.
 - Repeat the action until effective cleaning is achieved.
