PRODUCT

Product specially prepared for direct use in the tanks of vehicles, which serves to repel rainwater, removes and cleans the windshield of the vehicle all kinds of dirt, mud, mosquitoes, etc.

PROPERTIES

Product to use as supplied and that a cleaning of the windshield is achieved, eliminating mud dirt, mosquitoes, particles stuck to the glass and pleasant apple aroma. Given its composition, scratching and reflection on the surface is avoided, which achieves perfect visibility both day and night. Due to its composition, its freezing point is -10° C. below zero, which is indicated to act in winter by eliminating the ice formed in the crystals. Increases day and night visibility in periods of rain, improving vision in road safety in adverse weather conditions. Improves visibility even in areas where the windshield wiper does not reach. At speeds above 50 km / h it facilitates greater vision on the road due to the sliding of water on the windshield.

It facilitates the cleaning of insects, dirt and ice extraction throughout the time of year.
