

# CEROIL CONTACT CLEANER

Rust remover

Review Date: 15/03/2022

Page 1 of 1

## PRODUCT

Product to remove dirt in electrical systems.

## UTILITY

Dissolves and eliminates oxides and sulfides produced by the effects of flooding and humidity in electrical circuits and systems. It can also be used to remove oils and resins. Non-aggressive product. Does not attack the most common materials in electrical systems.

## APPLICATION

Apply the product on the piece and leave it to act for 3 minutes.

Before putting the electrical system into operation, let the product evaporate.

Suitable for cleaning alternators, electronic control units, printed circuits, windings, vacuum pumps, central locking and its receivers, electrical connectors, starter motors, etc.
