

CEROIL G-12 ANTIFREEZE

Low temperatures special antifreeze

PRODUCT

Concentrated antifreeze liquid especially indicated to protect any type of closed refrigeration circuit against low temperatures. Protects up to -35°C with 50% and up to -52°C with 100%.

- Does not attack different materials
- Great stability and low volatility
- Antioxidant protection of the circuit
- Does not foam and leaves no residue

APPLICATION

Empty the circuit and rinse with water several times in order to eliminate all the residues that are inside the system. Then, fill it with the desired mixture according to the desired protection temperature.

DOSE

It is used pure or diluted at 50% depending on whether you want to reach a temperature against freezing. See table:

100%	-52°C
50%	-35°C

* Available in 1L, 5L y 25L.

TECHNICAL DATA	
Color	Blue
Apariencie	Transparent liquid
Density	20°C : 1.109gr/cc +/- 0.005
Boiling point	$> 60^{\circ}\text{C}$ aprox.
pH:	100%: 8+/-0.5

Respectful with ENVIRONMENT
