

CEROIL STOP LEAK RADIATOR COOPER

Permanent sealing treatment.

PRODUCT

Permanent sealing treatment for the refrigeration circuit, made up of a mixture of ceramic particles and copper particles which activates the temperature, permanently sealing the leak. Aluminum bottle.

UTILITY

It is for all types of radiators and aluminum heating system, iron, copper and brass, including radiators with plastic tank.

ADVANTAGES

- Does not obstructs. Seals for the entire life the radiator.
- It does not attack joints or rubbers. Does not seal on sleeves.
- It is compatible with all antifreezes.

APPLICATION

SHAKE BEFORE USING

- 1- Pour the content into the refrigeration circuit.
- 2- Start the engine and let it on idling for 5 min.

- If cylinder head leaks or indoor water consumption, it is recommended to drive for 50 km and let it cool up.

DOSE

A dose of 500 ml. treats 25 liter circuits.

Reference	Capacity	Unit per box
C00036FNA	500 ml.	12
C00036HNA	1 L.	12
C00036JNA	5 L.	4
